

Fiorenzo Wattalage Fernando

Junior Full Stack JavaScript Developer

Education

London Metropolitan University London, UK 2017–2022
B.Sc. (Hons) Computing (2: 1)

Personal Projects

Ballcatcher | 2D Vanilla JavaScript Game February 2024
2D game in Vanilla JavaScript. Characters throw the ball to each other using mouse-click/press-hold drag. If the other catches, thrower wins. JavaScript is used to draw the characters and background on a canvas element.

Yako (E-Commerce) | MERN, Stripe January–February 2024
Example shop made from scratch by myself containing fake products. User can checkout and make payments thanks to the Stripe API, and admin can see these in the dashboard.

Portfolio | Next.js, MongoDB January–February 2024
Next.js 14 full-stack app using the latest app router, server actions, optimizations like prefetching product pages, optimizing images. This project also demonstrates the use of REST APIs to fetch fake blog posts, and to authenticate to GitHub. (Link on the top-right corner)

Work Experience

WH Smith | Sales Assistant March 2022–March 2023
Ensured book deliveries were counted and worked. Rotated books and stationery according to the seasonal promotions and ensured no gaps were present at any given time. Served customers at tills with speedy but friendly and exceptional customer service.

CyberCare | University Placement January 2022–March 2023
Investigated cases of victims of cyber crimes such as identity theft and cyber abuse by using different company tools. Attended meetings with clients to assess their cases after identifying factors that led them to be compromised by their perpetrators. Ensured outstanding levels of competence by leading and supporting teams on multiple occasions.

Costa Coffee | Barista Maestro January 2018–January 2023
Created the chain's drinks to perfection. On occasions when customers had requests, tailor-made the drinks to their preference. Handled hot foods. Cleaned and waited tables.
